

POOR ROBIN:

1700.

O R, A N

ALMANACK

AFTER A

NEW FASHION:

Wherein the Reader may behold, without a Pair of
Astrological Spectacles, many Remarkable
Observations: Together with a Two-fold Ka-
lender, VIZ. The Julian or English, and the
Round-heads or Fanaticks; with their several
Saints Days.

To which is added a Diary of the Weather which
shall undoubtedly happen in this Kingdom.

Written by **POOR ROBIN**, Knight of the
Burnt Island: A Lover of **TRUTH**.

Reader, expect not I'll uphold
For solid Truth, all that I've told:
What's true, and for your Purpose, Use it;
What otherwise, I pray excuse it.

DUBLIN: Printed and Sold next Door to the
Fleece in St. Nicholas-Street, 1700.

TO ANY READER.

E Ach Courteous Reader, Man or Woman,
Poor Robin Greets you all in common ;
 To th' Old or Young, to th' Rich or Poor,
 To th' Modest Virgin or Common Whore.
 To th' Gilting Maid or Gringing Cully,
 To th' Hen-Peck't Citty or Swearing Bully,
 To th' Country Rum, or Rampant Wife,
 Who puts on Cock-up 'stead of Colfe,
 That she her Spark may th' better wheedle,
 When th' Husbands out to thread her Needle :
Poor Robin willingly Submits
 Himself to every Sober Wit,
 Whose proper Talent chiefly lyes in
 A pretty Knack of Criticising ;
 He writes for's Pleasure, not for Moneys,
 As Ladies often Use their C---nys,
 And swears he means no harm, by t'
 But t' make you Laugh in Winters Night,
 Where with his pretty pleasant Tales,
 He'll save the milling of your Nailes.

If any Whimzy-headed, maddy-Scull'd, Independing Pha-
 natick, should be so Impertinent as to ask me why I write
 this Epistle ; KNOW, 'Twas only to fill up an empty Page,
 and may be of as much use for ought he, or I knows, as if
 I had plac'd here a Table, to tell you that the Dominical
 Letters this Year are G and F, Easter Sunday March the 31st
 St. Valentine's Day February the 14th, &c. But I grow tedious,
 and therefore will End my Epistle ; for should it have no
 End, it would be the Longest Epistle that Ever was
 Written.

The time of Feasting is not yet at an end, which makes me predict that some shall eat so much of Goose that their discourse shall favour of it all the Year after; as I knew one who by over-much feeding on Veal, stunk of Calf where-ever he came. There will be a continual Resort to the Taverns this Month by reason of the Frost and Snow, where a slice of hang'd Beef shall be at open Wars with a Glass of Sack in a weak Stomack: The Women shall make a great bauling in the Streets with crying of Oyfters, but those who sell nothing but Cherries and Plumbs shall be quite out of Trading: About the 23d Day of this Month there will be a great humming noise near the Four Courts: Clients have a care of meeting your Lawyers in a Place call'd Hell, because the same is very ominous.

Monthle Observations.

The direful Opposition of Saturn and Venus happening this Month, makes Afs-trologers predict that some great Woman (but whether in Body or Estate I know not) may chance to dye; but who, how, where or when, I protest I know no more than my Lord Mayor's Horse: It will likewise prove very ominous to our Town-Pads, who for their great Acutnefs, in exercising their Bodys too much in Vaulting Schools, may chance to be Advanc'd to a Carcs-Arse, and make their Backs do Pennance for their Tails. Yet for all this, I can't see that it will be any ways to the diminishing of their Practice; for our Leacherous Citts being forc't by their Pads Imprisonment to abstain, will be so very Vigorous at their next Meeting, that their Purfes shall pay any thing rather than Don P— shall want a bit for his Catt.

Monthly Observations.

Jupiter this Month is Lord of the Ascendant: And what then? Why then he is not Lord of the Second; but you'll say, What signifies this? I shall tell you that by and by; it signifies that Lawyers shall hardly be perswaded to take any Fees of their Clients, and yet follow their Causes for them very Vigorously; But when *Mercury* is in *Tvine* with *Venus*, then on the contrary, Lawyers shall be the Devil and all for Money; in the Country they shall Brew Controversies, at *Dublin* Tum them, and at the *Assizes* set them Abroach: Thus the Planets are blamed for such double Dealings; when the Knavery lies not in the Baker, but the Baker's Boy,

1	g	Lost my best	26	<p>This Month there shall happen a great Contention betwixt <i>John</i> and <i>Jack</i> about their Pedigree, <i>John</i> affirming himself of the Antientest House, because <i>Jack</i> is but a Deminutive Name of <i>John</i>: And <i>Jack</i> maintaining himself of the greater Family, because there is more <i>Jacks</i> than <i>Johns</i>. 'Tis farther like to be a Contentious Month, by the many Oppositions happening therein, for the <i>Galenists</i> and Chymical Doctors will have a Brush: The Chymists say they can make a Tincture of Sulphur shall make a Man live as long as <i>Methusalem</i>; the <i>Galenist</i> say they can make a Syrrup of Nutshells shall be as good; the Chymists say they can Extract Gold out of Cotton-Wool; the <i>Galenists</i> say they can Extract it with more Ease out Mens Pockets: At last they give one another the lye; but for all their curious Salves and Medicines, dare not venture the Cutting of one anothers Throats.</p>

Let the Effects of this Month be what it will, it commonly proves the sweetest in the Year, for the merry time of Christmas happening therein makes some Men conjecture that towards the latter end of the Month there will be abundance of Minc'd-Pies made.

Mercury and Venus are about this time in Consultation how to do Mischief, which makes some Astrologers predict, that by reason the Nights are long and dark, there may be some Shops broken open; but there are worse Inconveniences attends these long Nights, VIZ. that they Create plenty of Cuckolds: But who can help it! there is no Statute of Limitation will reach 'um; no Country whatsoever of so Barren Ground but what bears plenty of Cuckolds. Therefore, says the Moralist, *Patience is a Virtue.*

Poor Robin, 1700!

Of the Eclipses that will happen this Year.

THere will happen this Year 2 Eclipses, both of the Moon.

The first happens *February* the 21st, about 30 min. after 5 in the Morning, in the 13th Degree of the Coelestial Sign *Virgo*, and will be visible in our Horizon, if the Air be clear.

The second Eclipse of the Moon happens *August* the 18th, between 1 and 2 in the Afternoon, in the 5th Degree of the Coelestial Sign \times *Pisces*, and will be Invisible to us.

I Know that now as well as formerly, (in a *Treatise* of this sort) it will be expected I should say something of each of those parts, by which the Year is Divided (*viz.*) the four Quarters, the *Spring, Summer, Autumn,* and *Winter,*

Of which I know not to begin,
In bounding numbers for to Sing,
Yer'l venture on the Jolly Spring.

}

The Welcome Spring takes it beginning on the ☉'s Entrance on that horned Sign Aries, which is according to the Astronomers, March the 9th, at Noon.

Now is the time when Nature Cloaths the Feilds
With the Gaudy Livery that Heaven Yeilds,
Now is the time when Heaven's Comforts are
Disperst throughout the Fertile Earth and Air;

Now

Poor Robin, 1700.

Now is the time when th' Glittering Sun appears,
And dissipates the Cloudy *Winter* Sphears
With Fruitful Beams, t' revive the drooping Earth,
And give to every Flower a new Birth:
Now pregnant *Nature* doth her self disload
Of th' Treasures which she hath to each bestow'd;
The Earth doth seem proud of her new-born Dress,
Nor is the Air perfum'd with Odors less;
The *VV*atry Surface smiles to every Beast
That comes, the sweetness of his Spring to taste,
The Wind, which gently here and there Conveys
The Sweets which Nature, as a Tribute pays,
Through th' Flowery Grove 'its gentle Breezes goes,
Where th' Trees its pleasant Murmurings straight
Even *Natures* self is now again reviv'd, (shows;
To renew the Life which *Winter* hath depriv'd,
And every *Animal*, a warmth doth find
To cheer their Thoughts, and to renew their Mind;
The Sensatives doth from the Forrest Rove:
And leaves the *VV*oods, and melancholly Grove;
The Birds doth now begin to build their Nests,
Where they their Kind may procreate with rest,
And where in Dreams they may their Song rehearse
In Artless Numbers, and in Tuneless Verse:
The Fishes from the *VV*atry Deep doth Run
To th' purling Streams refreshed by the Sun;
The Spring, even withered Old Age doth Create
Anew, and adds fresh Vigor to their State;
Ageus like, their Dotage doth revive,
And Youth with all its Valour doth receive:

Poor Robin, 1700.

These are the Glories which the Spring afford,
For vvhich kind Heaven ought to be ador'd.

Of the SUMMER Quarter,

*The Summer Quarter takes place of the Spring, and
begins at the time of the Sun's mounting the Sign of
the Crab, which happens on the 10th of June,
about 2 in the Afternoon.*

THe Summer next, doth Challenge our faint Quill,
In bounded Numbers and in Artfull Skill,
To sing, vvhich vvell doth recompence the Toil
Of th' tir'd VVorkmen in a Fruitful Soil;
The Horned Herd novv gads through e'ery Field,
Parcht vvith the burning Heat the Sun does yeild;
The Flies from th' rude Inanimated Lump
Of Fertile Dung, vvith Active Motion Jump,
And in thick Svvarmes do Grovvd the Fragrant Air,
Steering vvith VVings their Passage here and there;
Novv doth the Angler 'gin his Bate to lay
VVith Eager Expectation for his Prey;
The vvearied Fowler, vvith his Net takes care,
His long expected Game for to Ensnare;
The Hunters novv do raise their Voices loud,
And vvith Shrill Horns do Call the Jolly Crowd;
VVho's hollow Op'nings fill the Echoing Air,
And fright from her close Form the timorous Hare,
Novv is the time vvhich Lovers Gentle prove,
Drovn'd in the Extasie of Ardent Loye;
VVhen th' Pleasant Fields invites them for to vvalk,
And doth afford them a fit time to talk,

And

Poor Robin, 1700.

And Dally in each others fond Embrace;
Their Mutuall Passions eager to Rehearse;
VVhere strecht on th' Flowery Bank of a fair Mead,
He lays upon his Mistrels Lap his Head,
And there unfolds his Love in Sighs and Fears,
VVhich she returns vvith Kisses, and in Tears;
VVhere both dissolv'd in Bliss, they seem t' Expire,
Being drovn'd in Eager Love and Fond Desire,
This is the time vvhich all these Fruits create,
And bald-pate *Autumn* doth Anticipate.

Of the AUTUMN Quarter.

The Autumn Quarter begins when Don Phœbus gets into the Ballance of Equity, a Sign in the Heavens, not on the Earth, which this year, is according to Computation, September the 11th, about 6 at Night,

IN what sad Grove, or silent Shade rehearse?
In melancholy Thoughts, and Tatter'd Verse,
The Dismal change which now, even now, appears,
When Trees do shed their Leaves instead of Tears;
To mourn the Great and Lamentable Fall,
VVhen Nature all her Sweets t' her Store-house call;
When every Bush, disrob'd of its Glory, stand,
And scatters all their Rayment through the Land;
VVhen th' spongy Earth its fruitfol Crep doth yeild,
And every Flower doth quit the Verdant Field;
VVhen th' Fleeting Sun puts on his Morning Robe,
And seldom chears with Beams the VVatery Globe;
The wither'd *Autumn* to an End doth bring
All the sweet Pleasures of the Fertile *SPRING*.

Poor Robin, 1700.

Of the WINTER Quarter

The Winter Quarter takes its beginning from the Sun's Entrance into the Sign of the Goat, which according to Astronomers is December the 10th, about 2 in the Afternoon.

Now *Aeolus* doth call his boisterous Rout,
And *Zephierus* the Nation Scours about;
Whose Dewy wings doth cause to Flow our Isle,
As th, *Eleſiæ* *Egypt* with the fruitful Nile:
Now *Boreas* his Frost sends through't the Land,
And in every River ſollid Liquors ſtand,
The Bald-pate Woods and every Field below
To th' Cattles grief are ditch'd with liquid Snow,
Now is the time for to turn Proſelyte,
To *Bacchus*, and to tope it all the Night.
